

Campus Club Event Management System

Ram, Rami, Akshay, Raj, Jeriah

Main Idea

Problem:

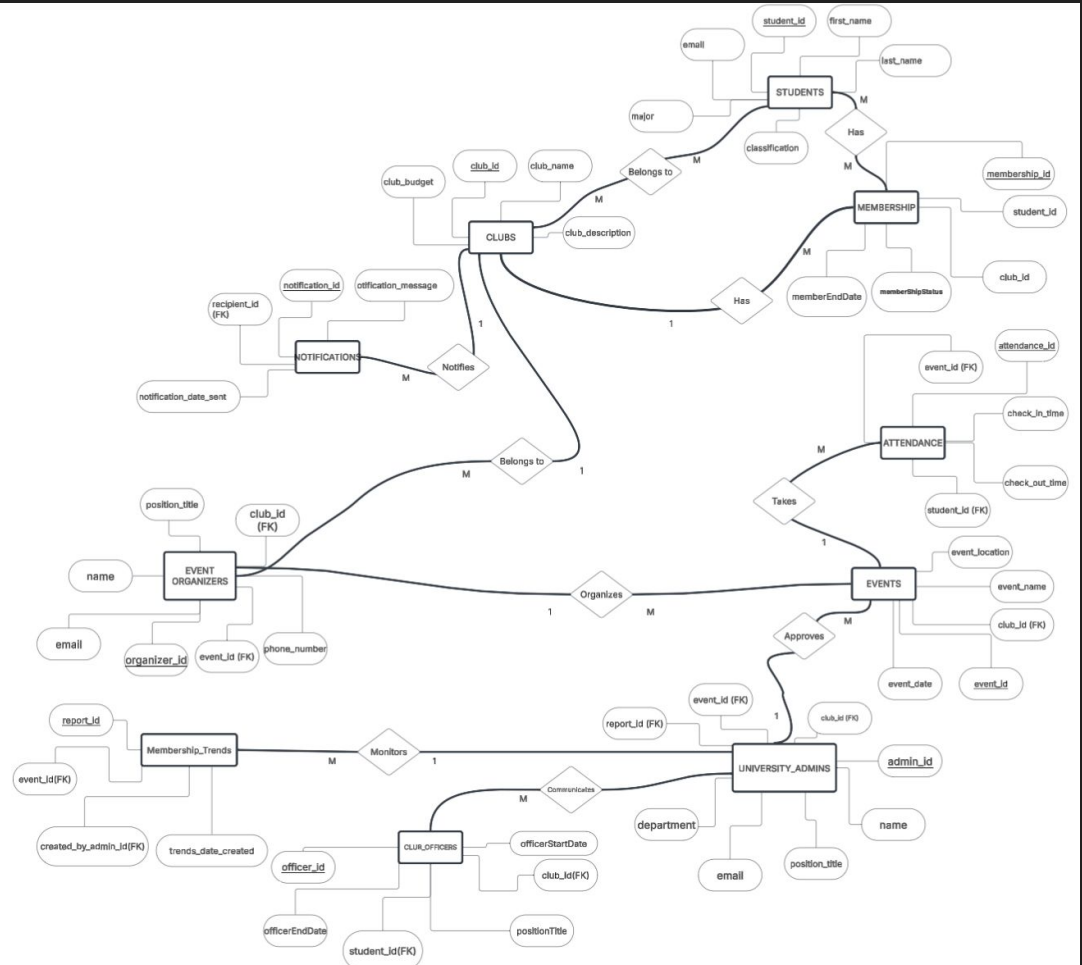

Managing campus-wide events is inefficient, with challenges in scheduling, tracking attendance, and generating reports for organizers

Solution:

- A centralized system that streamlines event planning, tracks student participation, and automates report generation for club officials

Target Users

- Students
- Club Leaders & Organizers
- Faculty & Advisors
- Event Coordinators
- University Administrators

Comparison of User Permissions

Students:

- Can browse and/or register for events, track attendance history, and receive event notifications

Club Officers:

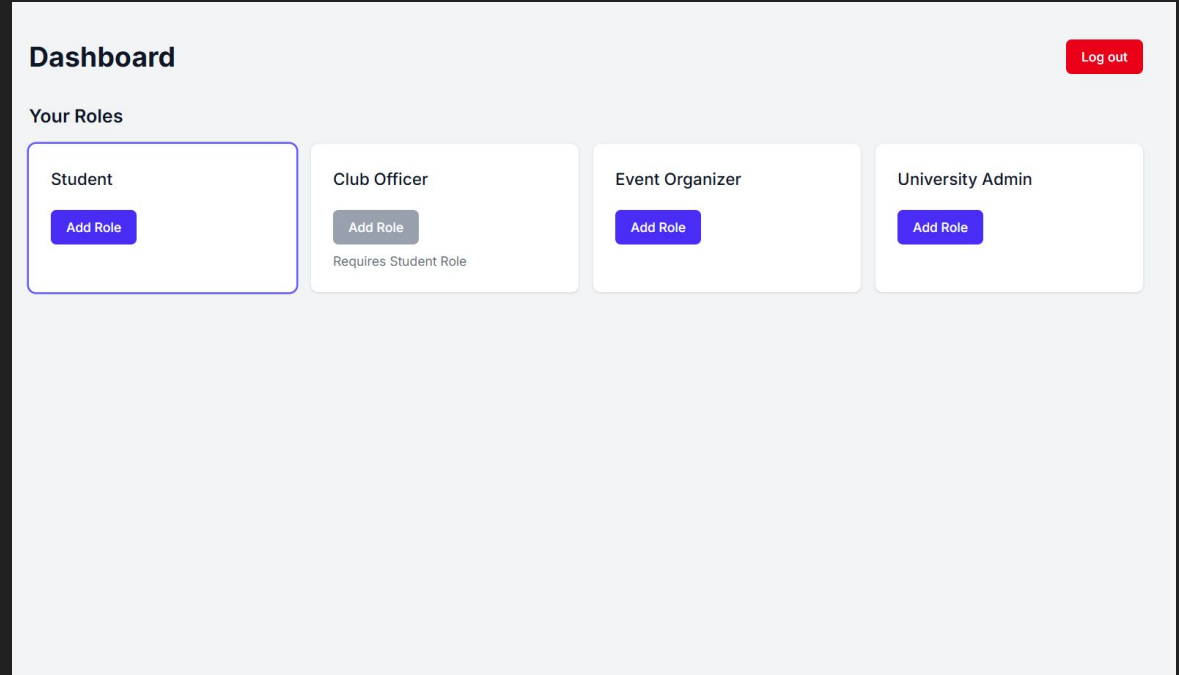

- Can create/edit events, manage attendance, and view participation statistics for their club

University Admins:

- Can monitor all clubs and events, create compliance reports, and administrate overall system security

Expected Features

- Club Officers
 - Event Management
 - Attendance Tracking
 - Membership Oversight
 - Growth Analytics
